AMERICOAT PLUS™ is applied in a two-stage process that allows the silicone coating to adhere tightly to the pan's surfaces, resulting in a longer glaze life. AMERICOAT PLUS™ helps baked products release from the pan easily when the glaze is fresh. Brand new glazed pans work best after first lubricating the pan's baking contact surfaces. As the glaze wears off, pans may need to be oiled more frequently. After the glaze finally wears off, the pan may have to be oiled with every use. For more information about cleaning and re-glazing your pans, visit www.pan-glo.com.
- PERMACLEAN™:** PermaClean is a revolutionary new coating that saves you money by keeping your pans and baking areas cleaner and safer. Call for minimum order quantities and pricing.
